**Hubungan Kecerdasan Spiritual dan Kecerdasan Emosional dengan Kinerja Perawat
Di Rumah Sakit Pondok Indah, Jakarta 2018**

xii + 44 halaman, 7 tabel, 7 lampiran

ABSTRAK

Kecerdasan spiritual dan kecerdasan emosional merupakan bagian dari aspek kecerdasan seorang manusia yang memiliki peranan penting bagi kinerja perawat. Kinerja petugas kesehatan termasuk perawat adalah kunci dalam upaya peningkatan profesionalitas dan kualitas layanan di setiap institusi kesehatan. Penelitian ini bertujuan untuk mengetahui hubungan kecerdasan spiritual dan kecerdasan emosional dengan kinerja perawat di Rumah Sakit Pondok Indah, Jakarta Selatan. Penelitian ini menggunakan metode kuantitatif dengan desain penelitian deskriptif korelatif dengan pendekatan *cross sectional*. Teknik pengambilan data adalah *total sampling* dengan jumlah sampel 60 responden. Instrumen untuk mengukur kinerja berdasarkan penilaian kinerja dari Rumah Sakit Pondok Indah Jakarta, instrumen kecerdasan spiritual menggunakan SISRI (*Spiritual Intelligence Self-Report Inventory*) dan instrumen kecerdasan emosional menggunakan *Emotional Intelligence Inventory* (EII). Analisis data menggunakan uji *kendall's tau B* diperoleh ada hubungan antara kecerdasan spiritual dengan kinerja perawat ($P\ value= 0.007$) dan ada hubungan antara kecerdasan emosional terhadap kinerja perawat dengan ($P\ value= 0.003$). Kesimpulan: perawat dengan kecerdasan spiritual dan kecerdasan emosional yang tinggi memiliki kinerja yang baik.

Kata kunci : Kecerdasan Spiritual, Kecerdasan Emosional, Kinerja Perawat.

**The Relationship of Spiritual Intelligence and Emotional Intelligence to the Nurses
Performance at Pondok Indah Hospital 2018**

xii + 44 pages, 7 tables, 7 attachments

ABSTRACT

Spiritual intelligence and emotional intelligence are part of the intelligence aspects of a human being that has an important role for nurses performance. Performance health workers including nurses are a key in efforts to improve professionalism and quality of service in health institution. This study aims to determine the relationship between spiritual intelligence and emotional intelligence with nurses performance at Pondok Indah Hospital in Jakarta. Total sampling techniques was used to select sixty participants. This research is quantitative research using cross sectional study design. A questionnaire was used to collect data, consisted of three parts, including measure performance based on assessment tools adopt from Pondok Indah Hospital in Jakarta, spiritual intelligence instrument adopt from SISRI (Spiritual Intelligence Self-Report Inventon) and emotional intelligence instrument adopt from *Emotional Intelligence Inventory* (EII). Analyzed data using Kendall's Tau B. The results of the study revealed that participant with low spiritual intelligence had a "B performance" (80%) and participant with low emotional intelligence had "A performance" (79.3%). spiritual intelligence (P value 0,007), and emotional intelligence (P value - 0.007) was significant with nurse's performance. Conclusion: nurse with good spiritual intelligence and emotional intelligence have a good performance.

Keywords : Spiritual Intelligence, Emotional Intelligence, Performance Nurses.
